OVERVIEW

A Full-Stack Web Developer and currently an IT Consultant with an involvement on several PHP-based projects that could handle back-end development, front-end development, application security and server management. A one-man team most of the time, and loves open-source & experimental projects. Very passionate in supporting, learning and contributing to the IT community, helping and sharing knowledge with the novice developers.

SKILLS

- PHP, Laravel, WordPress, JavaScript, jQuery, AJAX, SQL, JSON and Bash Shell Scripting
- MVC, OOP, Repository Pattern and Modular Pattern
- HTML5, CSS3, Sass, Bootstrap
- Development tools and utilities: Git, Composer, NPM, Postman, JIRA, Kanban, Google Maps API, FileZilla, Photoshop, GIMP
- Web hosting and server management with Linux (Ubuntu), Linode, AWS (Amazon Web Services), CloudFlare, NameCheap, WHM (Web Host Manager), cPanel, Load Storm for load testing, New Relic and LongView for performance monitoring.
- Basic knowledge in Java, Visual Basic, VB.Net, and Vue.js
